Bring your family, friends and pets
to enjoy refreshments, hospital tours and more fun.

Paws...
and Consider

ROCKFORD ROAD
Animal Hospital

To our clients, family, friends
*With our sincere
thanks...*

A message from Dr. David Brewer

Twenty five years ago, Dr. David Brewer started Rockford Road Animal Hospital (RRAH) with a vision of how clients would be treated. And today, 25 years later, the mission of RRAH hasn't changed: To treat every client and their pet with that personal touch. "Getting to know the families as well as their pets continues to be a pleasure," said Dr. Brewer.

This aspect—client relationships—is one aspect of veterinary medicine that is often overlooked, according to Dr. Brewer. "We thrive on these relationships as they so often affect not only our interactions but our ability to practice in a manner that meets the individual needs and expectations of our clients," said Dr. Brewer.

The RRAH team has grown through the years, yet everyone shares the same mission of treating every client with that personal touch. "Our team members share the RRAH philosophy and vision," said Dr. Brewer. We keep good team members because of the healthy work environment and we empower them. When RRAH opened, it was Dr. Brewer, his wife, Sue, who is also a veterinarian, and one technician. Today, there are five doctors, nine technicians, three receptionists and a practice manager.

The RRAH team.

Celebrating 25 Years of Caring for People & Pets

A look back on 25 years of caring

A look to our future

1988
Dr. David Brewer and his wife, Dr. Sue Brewer, open Rockford Road Animal Clinic

Our clinic kitties
Marley and Brewster, our ever faithful clinic kitties.

Through the years our building has been remodeled, our logo has been updated, but one thing has not changed. Our mission remains the same: Our goal is to treat clients' pets as if they were our own. Clients will experience this level of care at every visit. That's our promise.

Acupuncture and chiropractic care
Both chiropractic and acupuncture treatments work best with traditional veterinary care. Our doctors work with you and the specialist to provide the best care possible

Digital X-rays
We use digital X-rays to provide the best in patient care. Digital X-rays provide more accurate, better information so we can provide the best possible care for your pet.

New ways to connect, keep in touch and do business.

Be sure to "like" us on Facebook and check out our website. Also, we offer CareCredit and online shopping--all for your convenience.

Dental Care
In addition to digital dental X-rays, we offer complete dental care for your pet.

A lifetime of care From kitten and puppies through adults and seniors, we care for your pet at every stage. There are many more advanced options for care that have become available in the past 25 years, including complete physical examinations, time with team members and doctors to discuss every stage of your pet's life, and puppy and kitty packets to start your pet on the right paw. As pets mature, we offer complete Wellness Panels to provide preventative care.

1988
First RRAH team. We've come a long way in 25 years.

Medicine is safer, more effective
Remember when protecting your pet against heartworm was a daily pill? Now, it is a convenient, easy-to-use monthly chewable tablet that protects against heartworm and other parasites. Medicines are more effective, safer than ever before.

Pocket pets need care, too
From ferrets to rabbits and gerbils to hamsters, we offer the specialized care pocket pets require for a long and happy life.

First reception area. Note sign in window, "Now Open"

Making the golden years golden
Senior pets benefit from special attention as they age, which can maintain optimal quality of life.
